Mobile testing

About KiwiQA

We have an all-round QA & testing support structure that your software needs

We are a team of professionals dedicated to ensuring your software is 'ready' before deployment, before it meets your customers. We let you capitalize on our extensive testing services to enhance your software and stay a step ahead of the competition: experience agile frameworks and great attention to detail on your software with scalable and reliable results.

Release your products faster by getting them tested quicker and more accurately.

Mission-Vision-Core Values

Our Mission

- Create a passionate organization generating value for clients, employees, stake holders and society.
- Help SME's and Large Enterprises solve complex testing problems using our technology expertise.
- Build in-house QA Intellectual Property to provide industry-leading best solutions to our clients in the enterprise, technology and Services domains.

Our Vision

To become the world's most trusted & largest QA and software testing company.

Our ethos that guides us every day

Our values instill in us a spirit to continually serve our clients so that they can realize their full potential. We direct our efforts towards a robust testing strategy so that the results help you achieve your goals with utmost flair.

 Customer First

 Client Value Creation

 Teamwork

 Quality

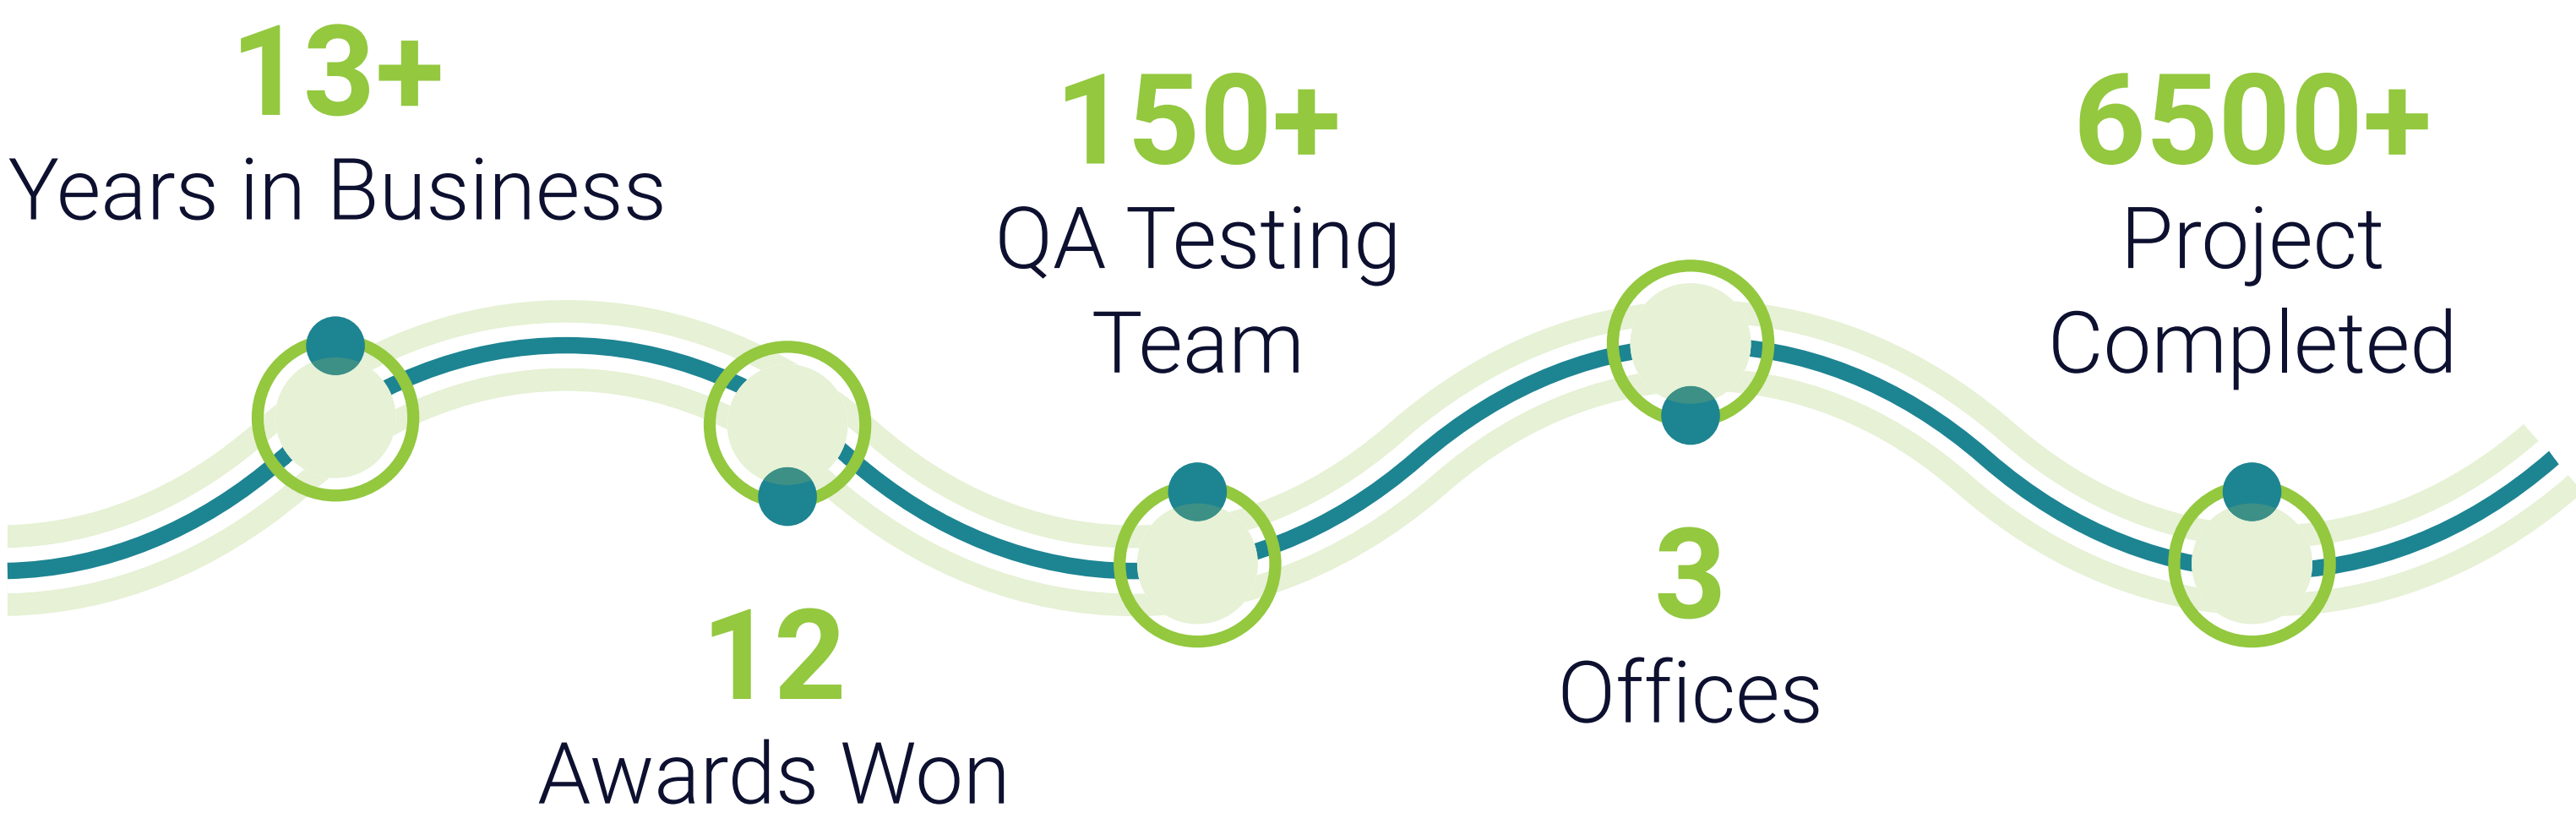

Why KiwiQA

With better software, we make you a first mover

Ensure your software is free of coding errors and bugs. By meeting customers' and clients' expectations regarding the quality of products, we also help support the reputation of businesses and their brands.

- Unparalleled technical expertise
 - Seasoned QA professionals
 - Flexible engagement models
 - Assured implementation success
- Zero defect spill rate
 - Comprehensive assessment & consulting
 - Experience across industries
 - Industry-leading tools & technologies

An infinite journey with finite milestones

Services extending beyond testing

The spectrum of services providing comprehensive solutions

Digital Assurance

- AI testing
- Salesforce testing
- Blockchain testing
- Wearable testing

Blockchain

Wearable

Available where you are

Full-range QA delivery services to help our customers with high-quality software, meeting tight deadlines for frequent releases.

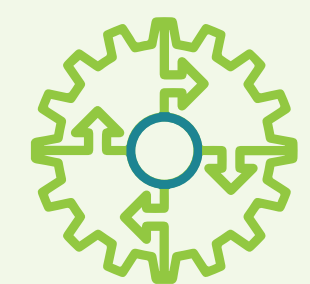

Managed QA services

Staff augmentation

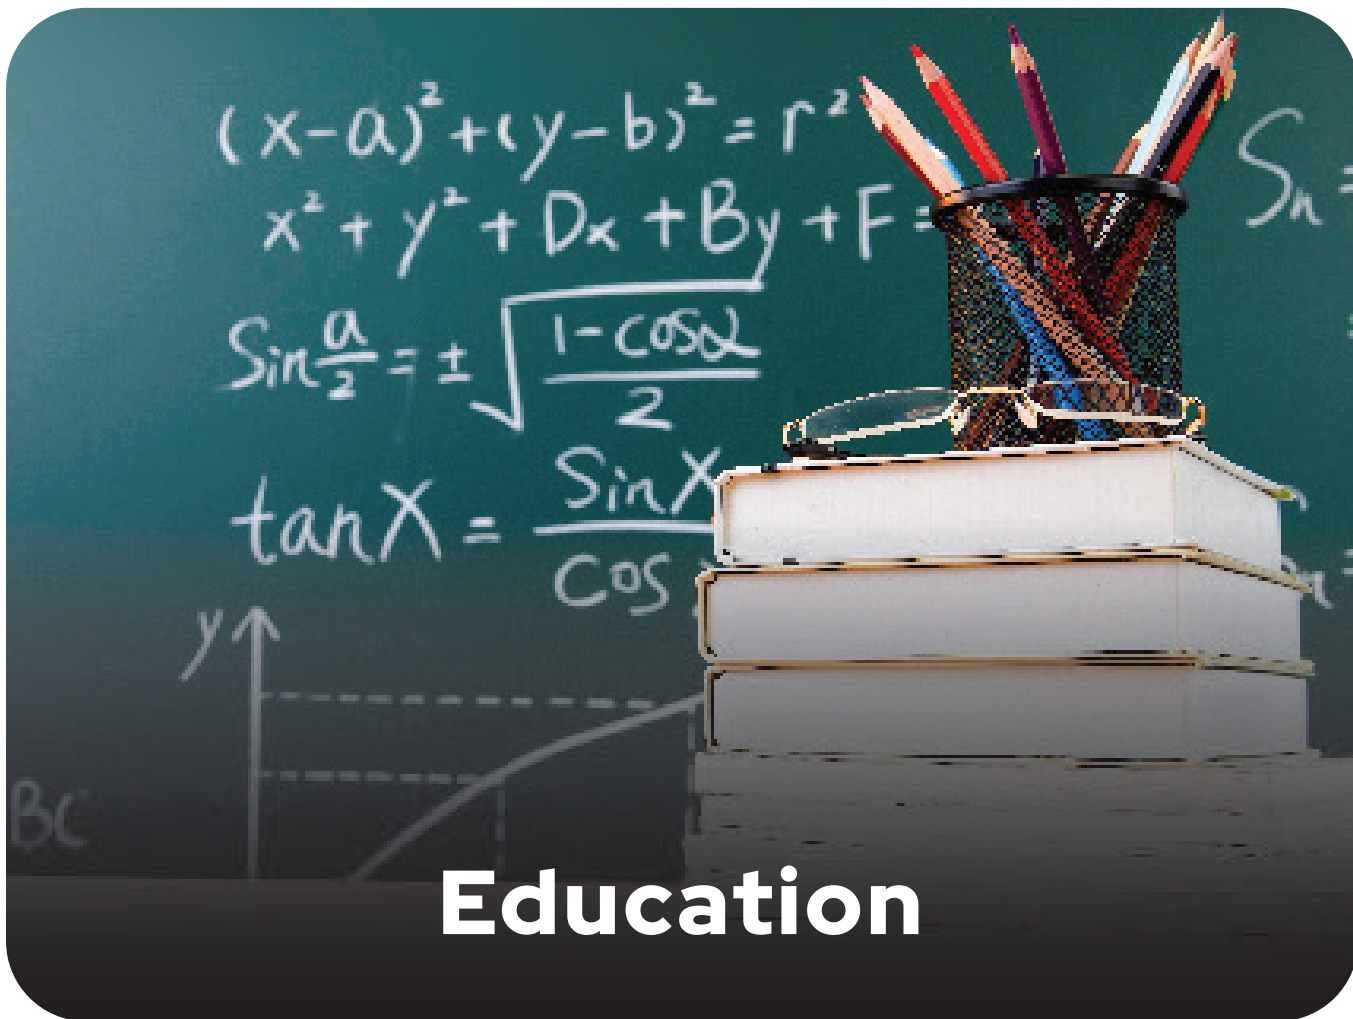

Onshore/Offshore

Outcome-based

QA testing simplified across industries

In an age where we rely on computers and software programs for all tasks, the importance of software testing becomes vital in all industries.

IP & Innovations, our own manifestation

Robust, innovative & in-house developed frameworks for unmatched testing

K-FAST

A 7-stage framework traverses through every stage of Software Automation Testing, from Automation Strategy Development to generation of reports depicting the state and quality of Software Test Automation projects.

K-ASCI

K-ASCI is used for delivering AI testing services by following the basic steps of assessing, constructing and implementing. It is quite advantageous for eliminating high operational costs, delay in go-to-market and improves customer satisfaction.

K-SPARC

K-SPARC delivers best-in-class performance testing & engineering services. It helps define and establish an Availability & Scalability parameter where predictable outcomes are the norm and significantly reduces rework and delays to delivery.

K-RASINS

K-RASINS fulfills the functional requirement of a set of workflows that help the doer achieve their specific goal through data attributes and paths. It gives accurate test results, coverage, a focused approach and planned mini regressions.

K-ASSIST

K-ASSIST enables a V&V strategy that envisions a complex integration mechanism with various interfaces to establish communication and connectivity. It helps reduce CoQ, and enables continuous value creation and advisory roles for planning, design, and execution.

K-LOK

It recommends the best approach to customers in planning, designing and executing tests for L10N, I18n, and G10N testing. It validates the software for local usage based on culture, perception and statutory regulations and requirements.

What do our clients say

It was a pleasure to work with Niranjana and his team of dedicated and comprehensive testers. Looking forward to our next engagement with the KiwiQA team, and having Niranjana oversee another successful project for us. A great experience full of support and passion to deliver a great service. Thanks Niranjana!

Rebecca VanZutphen
Founder

We used KiwiQA for a security audit of one of our web platforms. It was a very good cooperation and with the excellent reporting and risk assessment we were able to effectively fix existing vulnerabilities.

Enrico Mareth
Team Lead QA

KiwiQA provide high quality support at a very reasonable price. Their penetration testing on our platform was very thorough and provided us confidence in the cyber security of our system. I would recommend others to use KiwiQA.

Tim Walmsley
CEO

We use KiwiQA for our large custom projects. One of our custom sites their normal flow of automation testing was not going to work. They quickly found and implemented a solution. KiwiQA is very detail-oriented and has great communication. They are a pleasure to work with.

Scott Hunley
Devops Manager

KiwiQA has been providing advanced software solution testing services to Genix Ventures Pty Ltd for several years. The services included functional testing as well as load testing and test automation. We were very happy with KiwiQA's services and we can strongly recommend KiwiQA to other companies!

Mirko Siegel
Chief Technical Officer

KiwiQA has provided us the quality assurance testing that SimpleTix needed. Today we can ensure we are shipping out each release bug free. SimpleTix plans to grow 10X this year and we're glad to have KiwiQA with us.
